SUMMARY

Software Engineer on Ramco Systems' rTask.ai team, building an AI-first, multi-tenant helpdesk across a React/TypeScript front end, a Node.js API and a Python RAG service. Claude Certified Architect (Professional) who ships LLM features, hybrid search and test automation test-first.

SKILLS

Languages: Python, TypeScript, JavaScript, Kotlin, C, SQL, HTML/CSS

Front End: React, Next.js, Vite, Tailwind CSS, GSAP, Framer Motion, Jetpack Compose

Back End & Data: Node.js, Express, FastAPI, Flask, PostgreSQL, MongoDB, Firebase, Milvus, ChromaDB, Docker

AI & Agents: Claude API & Agent SDK, agentic workflows, prompt engineering, RAG (BM25 + vector), LLM evaluation & routing, OpenAI/Gemini/Bedrock

Testing & Tooling: Playwright, Vitest, Jest, manual test design, Git/GitHub, Vercel, n8n, Claude Code, Cursor, Windsurf

EXPERIENCE

Ramco Systems — Project Trainee, RXD (rTask.ai product engineering), Bengaluru **Jul 2026 – Present**

- Ship features across the React/TypeScript front end and Node.js/Express API of rTask.ai, Ramco's AI-first helpdesk: 35+ merge requests delivered with the 3,100-test Vitest suite kept green.
- Executed the production migration of the Python RAG retrieval service to Milvus BM25 hybrid search: 92 collections moved with zero failures, driven by a bash CLI built for the run.
- Evaluated TypeSafe Jev as an LLM-free intent router on a 50-case benchmark (100% action and agent accuracy, p95 under 660 ms), showing about two-thirds of intents can skip the LLM call.
- Redesigned the Knowledge Base Connectors UI/UX (Notion, Confluence, Google Drive, SharePoint, Azure) and closed a 200-issue fix list over six review rounds using a Git-driven delivery tracker I built.

Ramco Systems — QA Intern, Bengaluru

Apr 2026 – Jul 2026

- Built QTrack, a role-based test-tracking dashboard, alone and deployed it internally; Ramco's testing teams use it daily in place of hand-written status reports.
- Built a Playwright (TypeScript) regression framework with fixtures, page objects and a ten-suite KPI pack covering CRUD, validation, search, restrictions, performance and compatibility.
- Designed and executed manual test cases for the KPI and OKR modules and logged defects against business requirements.

PROJECTS

QTrack – QA Test-Tracking Dashboard (internal, Ramco Systems)

Apr 2026 – Jul 2026

Role-based dashboard where every test suite, run, owner and outcome lives in one place; designed, built and deployed end to end, first screen automated with Playwright.

Orbital Academy – Physics-First Rocket & Orbit Simulator (Live | Code)

2026

TypeScript simulator on a real physics engine: 30 real engines and 34 stages, a go/no-go weather poll, webcast-style mission control and a guidance-planned insertion burn.

Claude Marketplace – Claude Code Plugin Catalogue (Live | Code)

2026

Curated marketplace with a live dashboard: 423 agents, 346 slash commands, 885 skills and 92 MCP servers packaged as native Claude Code plugins, plus community plugins.

AI-Based Culinary Recommendation System (final-year project)

Feb 2025 – Dec 2025

Personalised recipe generation from a user's ingredients and preferences, behind a dynamic UI built for real-time response.

EDUCATION

B.E. in Computer Science Engineering — Sai Vidya Institute of Technology, Bengaluru

CGPA 8.85 | **2022 – 2026**

Pre-University (PUC) — Narayana PU College, Bengaluru

74% | **2020 – 2022**

SSLC (Class X) — Narayana E-Techno School, Bengaluru

83% | **2019 – 2020**
